ABOUT

The **BioTN Scipreneur Challenge** is an **entrepreneurship-based competition** organized by the BioTN Academic Alliance in collaboration with area universities.

This year's Challenge will encompass all Academic Alliance chapters from Memphis, Nashville and Knoxville. The Challenge leads students in a 10-week training program that showcases **STEM-related technologies** generated at the state's premier research institutions. The students are provided with entrepreneurship training that leads to a mock pitch for investment in the technology. Participating teams, comprising of research scientists, business students, clinicians and mentors, present a business plan and compete to win prizes in the final pitch competition, judged by state business leaders and investors.
