

MassBioDrive *Analyst Opportunity*

About MassBioDrive

Starting in the spring of 2022, MassBioDrive will provide intensive curriculum, mentorship, industry connections, and equity-free prizes to two small cohorts of early-stage biotech startups each year.

We'll source the most promising startups from our deep and diverse partner network and de-risk them using a two-step vetting process fueled by industry experts before they join our program.

In addition to a hybrid curriculum calculated to jumpstart their businesses, we provide startups with a small, dedicated group of mentors, networking events throughout the cohort, an end-of-program Demo Day to help grow their visibility in the ecosystem, and in-kind resources.

MassBio Drive Analyst Opportunity

MassBioDrive Analysts are undergraduate and graduate students pursuing degrees in the life sciences (biology, biotechnology, biomedical engineering, chemistry, or biochemistry preferred) or business, or experienced professionals who want to support the next generation of biotech founders. Analysts play a key role in MassBioDrive's program in that they review the cohort applications, conduct (minor) due diligence, and provide a recommendation on whether that company should proceed to the next round of vetting.

Analyst 2022 Commitment

Two times each year:

- Review 5 startup applications (total time commitment 4 – 6 hours)
 - Conduct an abbreviated scientific or business due diligence process, guided by MassBioDrive-generated rubric
 - Provide recommendation on which startups should advance to the next round (in-person interview with group of industry leaders)

MassBioDrive at a Glance

- 2 cohorts per year (spring & fall)
- 3 – 5 startups per cohort
- 8-week program
- 6 business-focused curriculum modules taught by elite experts
- Startups are post-tech transfer with < \$1M in funding
- Cohort selected after 2 vetting rounds (due diligence + interviews)
- Free for the startups & no equity taken

Analyst 2022 Benefits

- Access to MassBioDrive cohorts and MassBio Drive/MassCONNECT alumni network (100+ seed to Series B startups)
- Invites to all networking events and Demo Days
- Visibility on massbio.org
- Opportunity to help grow and evolve new program
