Jenn Adams, CEO

**JENN ADAMS, MIKE SCRIBNER, JEFF ELICH & MARIA MCGRESHAM**

**"ACCELERATING PHARMACEUTICAL DEVELOPMENT  
THROUGH EFFICIENT DESIGN OF EXPERIMENTS (DOE)"**

## **Program:**

- The goal of pharmaceutical development is to deliver novel therapies that can significantly improve the lives of patients. Along the drug development pathway there are multiple opportunities to accelerate the development process through thoughtful design of experiments (DoE) and a clear understanding of the regulatory framework. August Bioservices Scientists will discuss the high level milestones of the pharmaceutical development process, focusing on strategies to optimize discovery and increase speed to clinic of confirmed drug candidates.
