

How to Download and Install Respondus

Many instructors at Vanderbilt opt to use Respondus Lockdown Browser during online quizzes and exams. When Respondus launches, your quiz will be in a new browser that locks down your computer. While you are taking the quiz, you will be unable to use anything else on the computer. However, your instructor does have the ability to allow specific websites or a calculator if needed.

If you know that your instructor will be using Respondus, it is a good idea to download it onto your laptop ahead of time. This will save you time on test day. Here are the instructions on how to download Respondus on Brightspace.

Download and Install Respondus

1) In Brightspace, locate the quiz that will be using Respondus Lockdown Browser. A quiz that is using Respondus will state that in the quiz link, as shown below.
