

Vanderbilt University Center for Teaching

Enable NameCoach in your course

Brightspace houses a tool called NameCoach which allows students to record their name's pronunciation to ensure other people in their classes are pronouncing it correctly. Adding enables users to record their names for playback by the rest of the course. In this guide, we'll go over how this tool can be added to your Brightspace course.

Add NameCoach to your course

- 1. Open the Brightspace course in which you'd like to use NameCoach and navigate to the content page.
- 2. We recommend creating a module on your content page specifically for NameCoach. Once you've created this module, select the module to enter it and choose the **Existing Activities** dropdown. From this menu, choose **External Learning Tools**.

Search Topics Q	Namecoach	l ~		🔒 Print	Settings
Syllabus	Add dates and restrictio	ns			۲
Course Schedule	Upload / Create 🗸	Existing Activities 🗸	🌮 Bulk Edit		
Table of Contents		Add Kaltura Media	:reate and update topics
