

CSEO Postdoctoral Fellow Professional Development Series

Science Policy

Coleman Harris

PhD Candidate in Biostatistics, Vanderbilt University

In this session, we will explore science policy as an option for local and national advocacy and related science policy careers.

Mr. Harris is currently a PhD candidate in the department of Biostatistics at Vanderbilt, working on different statistical approaches to remove noise from imaging data in the cancer research space. He is interested in the science policy and science communication space, where he's written white papers, advocated on issues in DC, and networked in disciplines across the country to learn and grow the field of science policy. He is also a data scientist, freelance writer, and social media manager.

Friday, February 12, 2021

3:00 – 4:00 PM
