

PRACOP Spark Topics List:

1. At SRS there are three very different types of PAs: Salt-stone Disposal Facility, SRS Tank Farms, and the E-Area radiological landfill. A presentation about these three very different types of facilities that will all undergo DOE O 435.1 closure could be of interest.

2. U.S. EPA Superfund Remedial Program's Approach for Addressing Radioactive Contamination

3. U.S. EPA Superfund Remedial Program's Approach for Risk Harmonization when addressing Chemical and Radioactive Contamination at Sites

4. Correcting Some Misconceptions about EPA's Superfund Approach for Radiation Risk Assessment

5. Superfund Risk Assessment Approach to Assess Human Consumption of Food and Game and Efforts to Assess Tribal Consumption of Plants and Animal to Improve Assessments

6. NEA HDCS has developed a report on risk informed decision-making for decommissioning. This report contains decommissioning case studies (U.S. and international) and will be issued in November for comment. A presentation by one of the NEA board members and a discussion on the report and of the case studies could be of interest to a wide variety of PRACOP attendees.

7. Others?
