

OneVU Onboarding

Navigate to <https://onevu.vanderbilt.edu> in your browser.

Login using your **vunet ID** or @vanderbilt.edu email and click Next. Then enter your password and click verify. **Note:** *This password is the same one you use with your VUnetID.*

Once you are logged in with your Vanderbilt credentials. Click “Set up” under Okta Verify.

A screen with a QR code will appear (seen below). Leave this window open, but we will switch to your mobile device for next steps.

VANDERBILT UNIVERSITY

Set up Okta Verify

okta.onboarding@vanderbilt.edu

1. On your other device, download the Okta Verify app from the App Store® (iPhone® and iPad®) or on Google Play (Android® devices).
2. Open the app and follow the instructions to add your account
3. When prompted, tap **Scan a QR code**, then scan the QR code below:

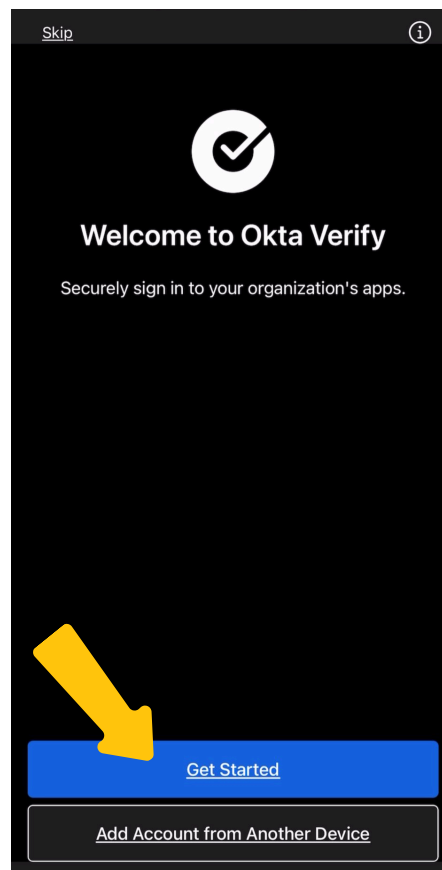

[Can't scan?](#)

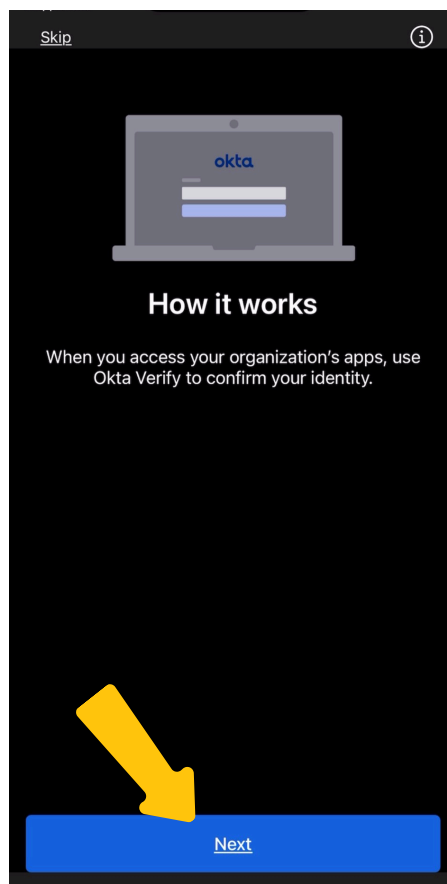

On your mobile device, go to either the Apple App Store or the Google Play Store and search for “Okta Verify” and select download. The application icon is displayed below.

Once downloaded, you will open the application, and select "Get Started".

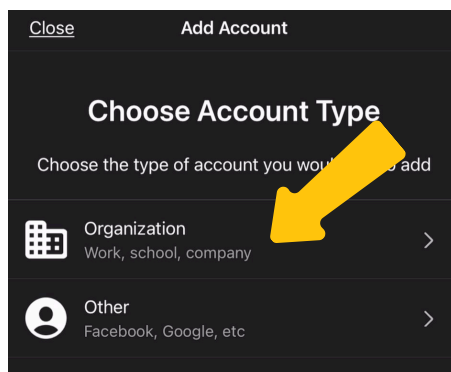

Then select “Next”

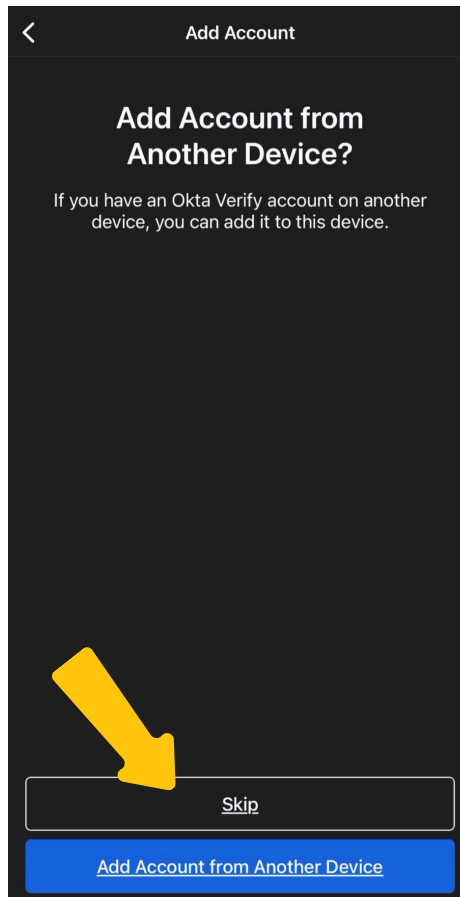

Then select “Add Account”

Then select “Organization”

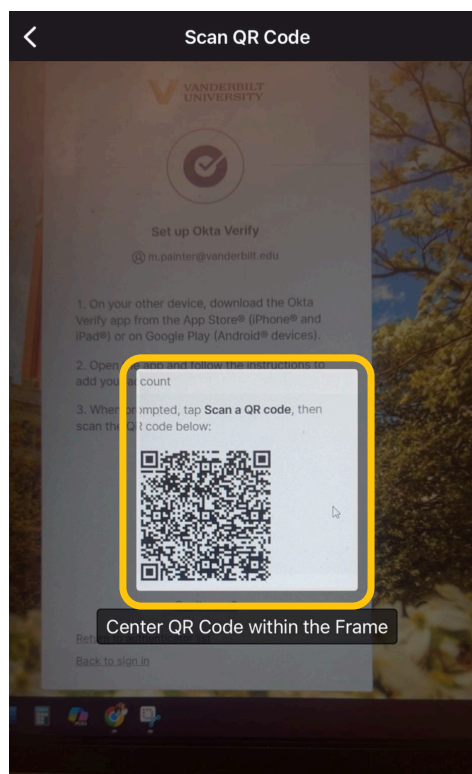

Then select “Skip”

Then select “Yes Ready to Scan” - your mobile device will likely require you to allow the application to use your camera.

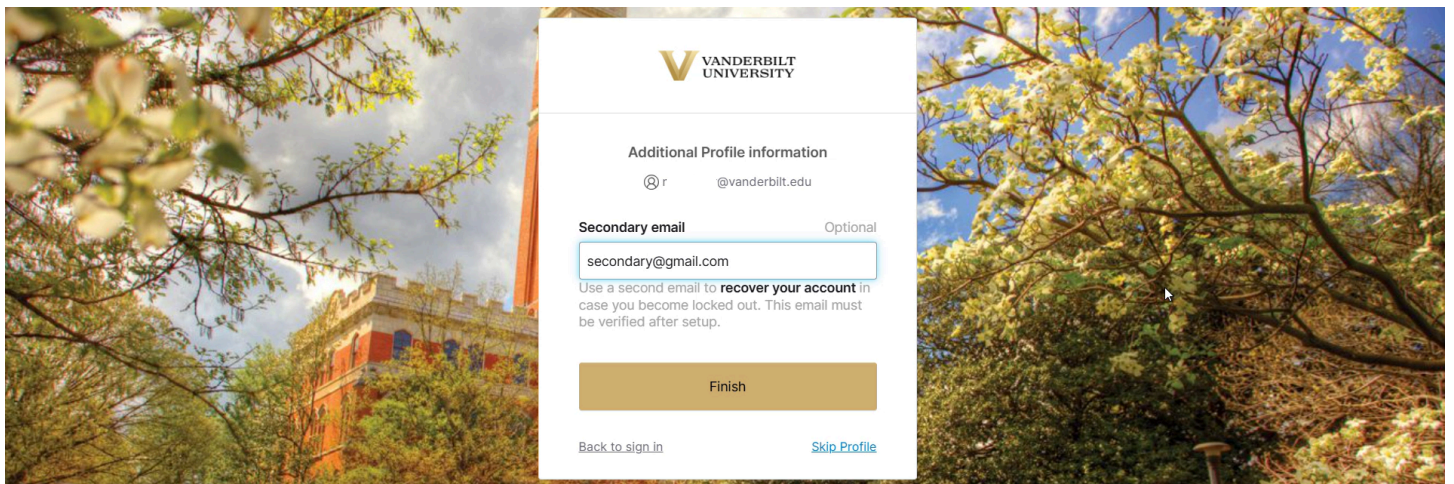

Scan the QR Code on your other device.

We highly recommend allowing the application to send you push notifications so that when Okta Verify sends you a push, it will come through on your phone without having to navigate to the app.

Now go back to your computer screen and click "continue". Then Enter your personal **non-Vanderbilt email address**. This email will be used in the event that you have lost access to your account and your and then you can choose "Finish".

Now you are in your OneVU dashboard. **Note:** To complete the secondary email address registration, you will want to navigate to your personal email account, find the email that was sent to you from One VU and select "confirm the email".
