Accessing the Training Records Module

Step 1
Login into EHS Assist - https://ehsa.vanderbilt.edu
- For Vanderbilt University individuals, use your VUNetID and VU password, along with the Duo app for SSO authentication
- For VUMC individuals, use your VUMC email and you will be taken to the VUMC SSO page for authentication.

Step 2
From the EHSA Homepage, select the Training Records icon.
How to View Current Training

The Training page is divided into three main sections:

1. **Attached Workers** – These are the current workers that have been registered to a specific PI. If you need to see former workers registered, click View Former Permit Workers.

2. **Training Requirements** – Not currently used in EHS Assist.

3. **Training History** – Instead of using VU’s Oracle Learning to view worker’s current training, use this section to see a view only feed directly from VU’s Oracle Learning site.

Note: Training cannot be edited or added here. Oracle Learn is still VU’s central platform for training.
A date customizable report is available that displays all the training history for a PI and their workers.

1. On the Training Page, click the Training Reports dropdown and select Training History by P.I.

2. A Report Parameters window appears allowing a date range with the PI information already populated.

3. Click View Report.

4. A multi-page pdf is generated that displays the training histories grouped by employee name.
EHS Assist – Additional Info
