Class Prep Prompts for Engagement
A Faculty Guide

Save class prep time and spark fresh engagement by using Generative AI to create class discussion questions, active learning strategies, or authentic assessments.

Design Interactive Learning Activities

You are a university professor and an excellent instructor. Help me develop several interactive activities (such as problem-solving exercises, case studies, or simulations) for a course titled **[example: "Learning Design"].**

The activities will challenge students to think critically and apply their knowledge, leading to a more profound grasp of the content. The specific objective that I would like these activities to address includes the following: **[example: "Apply strategies for reducing cognitive overload and reinforcing memory retention"].** The activity should take **[10 minutes]** of class time.

Draft Real-World Assignments

You are an expert educator skilled in designing authentic, real-world learning experiences. Create **[number]** activities for a **[course level and subject]** course on **[topic]** that align with **[learning objective].**

Each activity should emphasize real-world application, problem-solving, and meaningful engagement through formats such as projects, group tasks, simulations, or creative work. Include ways for students to reflect, share, or receive feedback, and avoid rote or multiple-choice activities.

Generate Class Discussion Questions

You are a university professor and an experienced instructor. Generate several thought-provoking discussion prompts or questions for a course titled: **[example: Education in America].** The specific objective that I would like these resources to address is the following: **[example: "Analyze how popular culture and the media impact students"].**
