

Projects 2019

- Towards an Interactive Electronic Health Record to Support Clinical Expertise
- Cognitive Models of Emotion and Empathy
- Computational Modeling of Olfactory Perception with Connectionist Systems
- Interactivity and Personalization in Intelligent Tutoring Systems
- Survey of Computational Psychiatry
- Attention Mechanisms in Individuals with Major Depression
- Towards Modeling Human Music Perception to Facilitate Automated Music Therapy
- Surveying connectionist approaches to visual analogy
- Requiem for a daydream: Exploring interference effects in the visual response to music
- Effects of Language on Cognitive Diversity
- Perception is Cognition: Selective Attention Mechanisms in Visual Processing
- A Survey of Hierarchical Classification in Human Cognition and Artificial Models
- A Survey on the Dynamics of Coopetition
- Peeking on What Human Brain is Seeing: Machine Learning Approach
