

Android Devices with Cameras

1. Go to Play Store and search for "Augment" app.
2. Download app for free.
3. Place this sketch on a flat surface.
4. Hold your device above the building sketch with camera facing downward.
5. Open the Augment app and select "Scan."
6. Within seconds, you'll be treated to a 360° preview of Vanderbilt's new Engineering and Science Building.

Apple Devices with Cameras

1. Go to App Store and search for "Augment" app.
2. Download app for free.
3. Place this sketch on a flat surface.
4. Hold your device above the building sketch with camera facing downward.
5. Open the Augment app and select "Scan."
6. Within seconds, you'll be treated to a 360° preview of Vanderbilt's new Engineering and Science Building.

* If the camera gets too far out of sync with the sketch, repeat Step 4 to recalibrate the model.
