

Errata: The Locus of Dread for Mass Shooting Risks

This note aims to correct the errors in the initially published article, Dalafave & Viscusi (2023). The numbers in the (20,50) and (50,20) rows were reversed in Table 10, which is in the Appendix. Other elements of the table remain. The discussion of the results in the text was correct, and the interpretation of the results is unchanged. The corrected table appears below.

Table 10 Scope Tests for Risk Tradeoffs

Number of mass shooting deaths	Number of firearm homicide deaths	Percent respondents choosing mass shootings	Percent respondents choosing equally good	Percent respondents choosing firearm homicides
20	20	23	53	24
20	30	25	16	60
30	20	55	16	28
20	50	26	11	63
50	20	60	10	30
20	10	58	15	27
10	20	24	15	61
