How to add your card to mobile wallet

You can add your J.P. Morgan Commercial Card to Apple Pay, Google Pay and Samsung Pay to use as a convenient and secure payment method for business purchases—in-store, in-app and online.

Tap. Pay. Go.

1 → **2** → **3**

Open
your mobile wallet

Add & authenticate
your card

Pay
choose your corporate card, tap, and go

You may be asked to authenticate by using a one-time passcode, which will be sent to the email address or mobile number currently on file with your Commercial Card. The one-time passcode could take up to five minutes to receive. Messaging and data charges may apply.

Mobile wallets can be used with millions of businesses and in apps, such as **Grubhub, Starbucks®, Uber™, Dunkin' Donuts®** and more.

Contact a Program Coordinator for more information on your program's mobile wallet capabilities, and learn more about our cardholder-facing communications to get your cardholders all the information they need.

Please note cardholders in Canada only can utilize Google Pay.

Security

Mobile wallet usage benefits security and protection of card numbers. A merchant never receives your primary account number.
Convenience and efficiency for cardholders

Business purchases are quicker and more efficient when using a mobile wallet.

A modern payment experience for cardholders

Give your cardholders the same experience they are already taking advantage of with their personal cards for every day purchases.

Contact our Program Coordinators, 24 hours a day, 7 days a week. Have your company number and verification ID available.
