

THE BARTON BUNCH

GABRIELA ROBINSON, B.S.

**HERE'S THE STORY OF A
LOVELY RESEARCHER...
GABBY!**

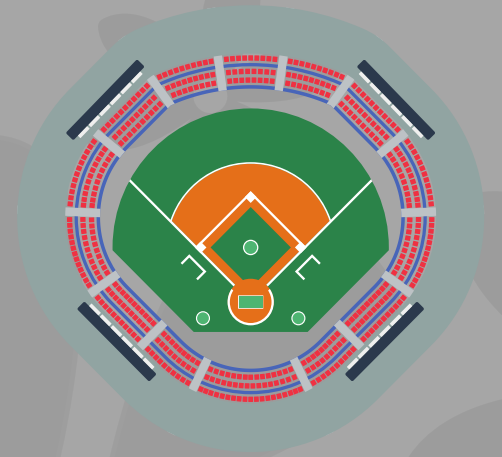

THE BARTON BUNCH

GABRIELA ROBINSON, B.S.

Meet Gabby, a 2nd year master's student!

She and her family have a goal to watch a game at all of the major league baseball game stadiums

She is from San Antonio, TX and graduated from Texas A&M (Gig em!)

She tried learning to bellydance in elementary school, but it didn't work out due to a lack of rhythm

THE BARTON BUNCH

GABRIELA ROBINSON, B.S.

A few of her research interests include...

How young children develop emotional competency and how early childhood educators and interventionists can be intentional in supporting children's learning in this area

THE BARTON BUNCH

GABRIELA ROBINSON, B.S.

What have you been researching in Barton Lab?

"I have been working on my thesis which is a systematic review of how preschool children learn to identify, express, and label emotions. I'm not quite done yet, but am excited to share the results when I finish synthesizing the data! Findings from the review will let caregivers and practitioners know how to teach emotions to preschool children to support their overall social and emotional competence."

THE BARTON BUNCH

GABRIELA ROBINSON, B.S.

What do you hope to do after you graduate from Vanderbilt?

"I hope to work at an ABA clinic in Texas to support young children with challenging behavior and/or disabilities. Later in life, I hope to coach teachers on using behavior analytic principles to support children in their classroom."
