CREATE

Cut small circles and stars from colored paper. Glue large black circle onto paper plate, and then glue planets and stars to the paper.

Draw your favorite constellations with a white pencil and use a pushpin to make a small hole in each star.

In a bright room, place one end of a cardboard or paper tube over a constellation circle, hold the tube and plate up to the light, and peer through the two to see the formation.

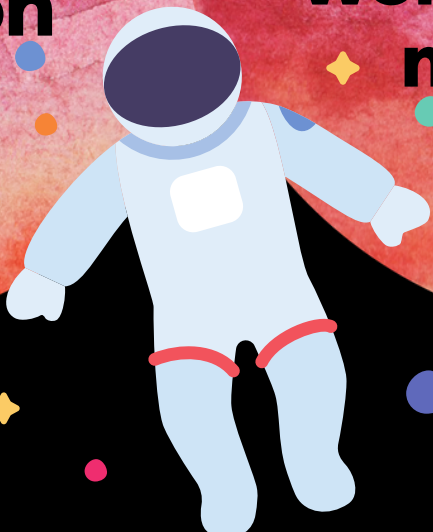

In a darkened room, hold a flashlight in front of a constellation circle to project the formation onto the wall.

CONNECTION TO LEARNING

**This can teach
children about
astronomy and
observation
skills!**

**Creating these
constellation maps
can help children
work on their fine
motor skills.**

SHARE WITH US

**What
constellations did
your children
observe?**

**Share with us!
