

FUN FRIDAY
ZOO ANIMALS:
MUSIC AND
MOVEMENT

WORK ON LISTENING,
BUILDING VOCABULARY,
AND MOTOR SKILLS WITH
THIS FUN ACTIVITY!

SET IT UP

Use this print out to cut out your favorite animals

Place an animal photo on each side of a die (or put into a bowl)

Have children roll the die or pull from a bowl

Have them label the animal and imitate what sound and movements the animal makes

Put on music to make the game more fun

Ask children what animals they want to add next time

LEARNING CONNECTIONS

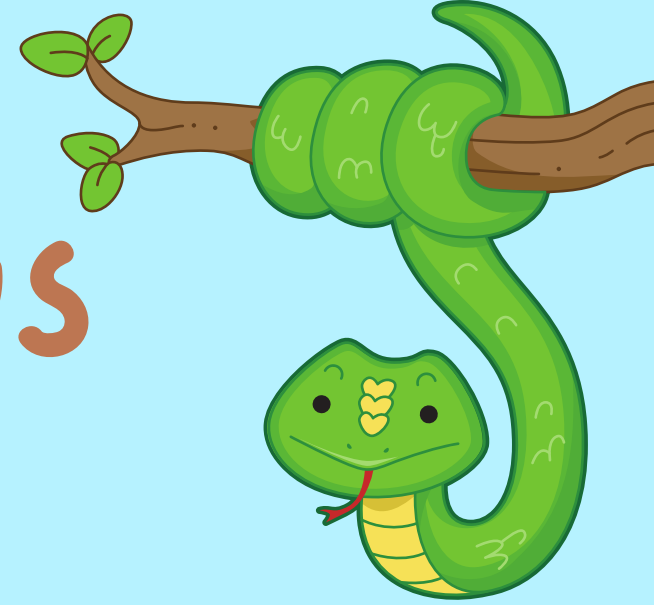

Classroom games can increase social interactions between peers

Learning new animals and sounds can help build children's vocabulary

Imitating animal movements can support gross and fine motor development (and is great exercise).

SHARE WITH US

How did you adapt the activity?

What were your class's favorite animals?

Share your experiences
