

INTERESTED IN A  
**CAREER**  
IN BIOMEDICAL  
**IMAGING?**

Vanderbilt University  
*Institute of  
Imaging Science*

- IS SEEKING -

*Postdoctoral  
Research Fellows*

for 2-year research training opportunities supported by the National Institute of Biomedical Imaging and Bioengineering

We seek qualified, motivated PhD science graduates (US citizens or permanent residents) from any discipline (physics, chemistry, engineering, mathematics, computer science, or a biological science) to undertake a mentored research training in the development and applications of MRI.

Prior experience in MR or medical imaging is NOT required.

**WHY:** Biomedical Imaging continues to grow as an important discipline; magnetic resonance imaging (MRI) and spectroscopy (MRS) provide an array of powerful techniques used in basic research and clinical medicine.

Our trainees have found rewarding careers in academia, industry, education, science administration, science journalism, and in medicine.

**WHERE:** VUIIS sits on the Vanderbilt campus in Nashville, TN, a vibrant, dynamic city known for music, sports and a high quality of living.

VUIIS offers superb facilities and an internationally-recognized faculty to enable trainees to become expert in modern MR technologies and applications.

Faculty interests and resources are illustrated at [vuiis.vumc.org](http://vuiis.vumc.org).

Stipends vary depending on experience. Fringe benefits include payment of health insurance.

We are especially interested in increasing the diversity of our trainees in our current recruitment.

ENQUIRIES & APPLICATIONS SHOULD BE SENT TO:
