EXPERIENCE

Tennessee Department of Health | Healthcare Associated Infections Program Clerk 3

February 2019 - Present

- Review and document provider-reported cases of carbapenem-resistant Enterobacteriaceae (CRE) and facilitate isolate submission to the state public health lab for confirmatory testing
- Assist epidemiologists with investigations of multidrug-resistant organisms and potential outbreaks
- Assist infection prevention consultants in the assessment of healthcare facility infection prevention policies and practices through site visits, staff interviews, and chart reviews

Vanderbilt University Medical Center - Department of Health Policy | Research Assistant

November 2018 - Present

- As a team member of the Vanderbilt Initiative for the Study of Antimicrobial Resistance, lead or assist with various epidemiological research projects to increase our understanding of antimicrobial resistance, its causes, and possible solutions

Catalyst Healthcare Research | Research Associate

July 2015 - December 2018

- On behalf of health systems, private practitioners, preferred provider organizations, health maintenance organizations, and non-profits, assessed patient experience through surveys, focus groups, and in-depth interviews
- Designed, programmed, and deployed surveys via email, phone, and mail
- Analyzed quantitative and qualitative data and translated findings into written reports, presentations, and visual dashboards for clients and their stakeholders
- Hired, trained, and managed part-time data entry staff

DVL Seigenthaler | Assistant Media Buyer

May 2014 - July 2015

- Worked with clients in the healthcare, education, and banking industries to identify the most cost-efficient media mix to effectively reach target audience
- Budgeted for, negotiated, and purchased broadcast, print, outdoor, and digital advertising space
- Worked closely with accounting to develop contracts and reconcile media invoices
