## **Bio**

I'm a 29 year old female doctor with three years of experience as a Medical doctor working in district hospitals in Rwanda. I have been a part of Global health corps fellowship where I represented Rwanda in being a change maker in global health field. I have also been able to participate in nationwide research and have done personal research in Maternal-child health care which has led to me learning how to be a doula. My passion is working with vulnerable groups of people in different NGOs or government organizations. I am a proud advocate for girls and women in educational and professional settings. Apart from the above; I love people, diversity, travelling, gym, swimming plus a secret love for arts.

---

---

## **Work Experience**

---

**2018(June-August): Global Health Corps Fellow**

**Ministry of Health-Rwanda:**

Medical internship coordinator

My responsibilities were to create and renovate a project to help make a smooth transition for medical students into the professional setting. I trained in Yale University with over 1000 global health enthusiasts from different part of the world for two weeks with specialists in different global health scenes.

**2017 - 2019: General Practitioner, Kibagabaga District Hospital**

***Responsibilities and achievements:***

In this three year period I have been in position of leadership where. I have been able to do outreach services in health centers through health education or supervision to over 500 Rwandans. I have treated over 2000 Rwandans in different services pediatrics, surgery, obstetrics and Internal medicine.

**2015 - To date: Mentor, MasterCard scholarship under Fawe Rwanda****Responsibilities and achievements:**

In this role I have mentored over 150 ladies in secondary school .We noticed decrease of early childhood pregnancies, the ladies also chose and excelled in science based subjects.

**2016 - 2017: Intern-Doctor, Masaka District Hospital****Responsibilities and achievements:**

My goal was to gain practical skills, in surgery and Obstetrics but also treat patients in various services under direct supervision by my senior colleagues. I was bestowed upon to be assistant lead doctor in Neonatology where we drastically reduced hospital stay for neonates, reduced neonatal cross infection and increased survivability by early detection of disease and maternal education.

**2014: Anthropometrist, CIAT****Responsibilities and achievements:**

We were bestowed upon task of taking anthropometric measurements of all women with children under 2 years and their offspring. We did this research all over Rwanda and measure more than 30000 women and children. More to the above I was also tasked with data entry and leading of my team on the field where we improved efficiency of team work by division of labor.

**2013: Intern, Sanejo Education and Community Development****Responsibilities and achievements:**

I taught 15 teachers interactive teaching methods and helped enhance their English skills. More to this I taught over 600 students from grade 1-6 in rural area in Southern Rwanda. I was also able to assist in building 4 classrooms together with Australian volunteers from YGAP.

**2010-2012: Customer Service Agent, MTN****Responsibilities and achievements:**

I helped out clients with technical issues with our mobile network, and also helped our clients navigate different services that we offered.

**2006: Volunteer, Gisimba Orphanage****Responsibilities and achievements:**

I volunteered here in teaching and doing cleanliness in the orphanage with over 70 children of different ages. We assisted with school work and helped inspire and encourage them to have positive outlook in life.
