Article II: Conflict of Interest Guidelines

F. Healthcare Industry Sponsored Activities

Conflicts of interest in Healthcare Industry Sponsored Activities involve situations in which financial, professional, or other personal considerations may compromise, or have the appearance of compromising an individual's judgment in the provision of patient care, procurement, or other professional activities. The bias which may result from such conflicts of interest may impact not only the collection, analysis, and interpretation of data, but also the hiring of staff, procurement of materials, clinical referrals, sharing of results, choice of treatment, or otherwise influence the provision of patient care or the execution of one's professional duties.

I accept and agree to these Conflict of Interest Guidelines.
