

**SECTION 01 58 13 – TEMPORARY PROJECT SIGNAGE**

**PART 1 - GENERAL**

**1.1 DIRECTIONAL SIGNAGE**

- A. The Contractor shall use temporary project signage as needed to direct construction vehicles to and around the project site and for improving safety and productivity on the site. The Contractor shall not use temporary signage to advertise any company to the general public. Signage identifying any company is prohibited from placement on cranes, fencing, or any other temporary or permanent structures.

**1.2 PROJECT IDENTIFICATION SIGNAGE**

- A. Provide at least one project identification sign containing such lettered and graphic data and description relative to the construction as designed by the Architect. The sign shall include at least one rendering of the building in finished form; the projected final completion date; a listing of the names and addresses of the members of the design team including the Landscape Architect; a listing of the names and addresses of the Contractor and major subcontractors; and the name and address of the Owner.
- B. The sign shall be approximately 4'-0" by 8'-0", and it shall be constructed of exterior grade plywood 3/4" thick, or as otherwise approved by the Architect, and shall be mounted on a rigid, substantial wood timber frame with rust resistant screws or bolts. Provide all edges with molded wood casing.
- C. Maintain all signs in good and neat condition until such time as the Architect authorizes their removal.

**PART 2 – PRODUCTS**

Not Applicable

**PART 3 – EXECUTION**

Not Applicable
