Book Project

Veteran Disorder: On Care and Ex-Military Life in a Veteran Treatment Court

Under contract with Princeton University Press, September 2018

This book is based on three years of extensive fieldwork in a military community in the US South with one of the largest post-9/11 veteran populations in the country. It focuses on the diverse and often entangled medical, legal, bureaucratic, and social processes by which servicemembers are rendered “disordered” in ways that necessitate normalization and coercive management, but also care. With ethnographic threads rooted in novel spaces of veteran care, including civilian therapists, transition counseling services, and a specialized court for veteran offenders, this book explores the contemporary incarnations of the “problem veteran” across themes including diagnosis, disability, criminality, work, and human-animal relations.
