Join the TN Organic Growers Association (TOGA) on Friday, March

Vanderbilt campus expands plastic recycling

Just in time for a strong finish in [RecycleMania](#), the Vanderbilt campus recycling program is expanding plastics recycling to include all plastic containers! Previous recycling vendor restrictions only allowed for recycling plastic bottles with resin codes 1 and 2 on Vanderbilt's main academic campus and in student areas. Vanderbilt's new partnership with Waste Management Inc. now allows for the collection of all plastics, regardless of what type. Read the [full article](#) to learn more about the expansion and which plastics can and cannot be recycled.

Vanderbilt Printing Services to become FSC certified

Tom Fox, director of [Vanderbilt University Printing Services](#), has announced that his facility has begun the process of becoming [Forest Stewardship Council](#) (FSC) Chain-of-Custody certified. Upon completion of the work to implement the FSC rules and procedures within the organization, VUPS will be able to provide FSC-certified printed matter to any customer desiring their order to carry the well-known and respected certification mark. In addition to the FSC mark, customers also will be offered the option to add the Rainforest Alliance mark to their FSC-certified jobs. VUPS is working with the Printers Green Resource LLC InGreen Program to complete the work necessary and expects to be fully certified no later than mid-April. Read the [full article](#) published by Vanderbilt News and Communications for more information.

So bring your lunch and join us to learn about greening your landscaping and gardening this spring! Read the [full announcement](#) for more information.

Nashville rolls out green roof on new convention center

Downtown Nashville's new convention center will feature a four-acre green roof, which is scheduled to be completed by the end of March. The green roof,

which is being installed by Landscape Support Services of Murfreesboro, is being put in place to avoid urban storm-water runoff and as an added benefit may provide some insulation to the convention center.

In Nashville, when heavy storms hit, the combined storm water and sewer systems can overflow causing raw sewage to wash into creeks and the Cumberland River. Green roofs are a beneficial and effective option to solve this problem. Read the [full article](#) published by *The Tennessean* for more information.

ACC Clean Energy Challenge encourages students to develop business plans for new clean energy companies

The [\\$100K ACC Clean Energy Challenge](#), supported by the [Department of Energy's \(DOE\) Office of Energy Efficiency and Renewable Energy \(EERE\)](#), invites
