

How do I view specific quiz questions after the quiz is submitted?

There may be many reasons you need to view individual student submissions by question. For example, to determine which students have answered a quiz question that needs to be adjusted. In order to view student quiz answers after they have been submitted, follow these steps:

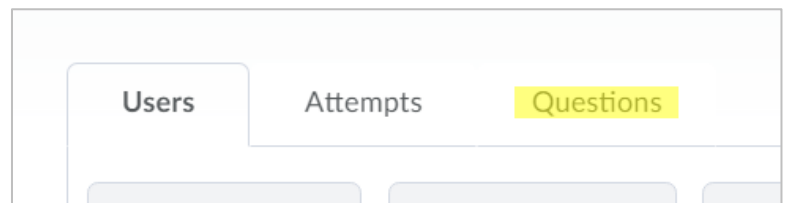

1. Select **Activities & Assessments**, then **Quizzes**.

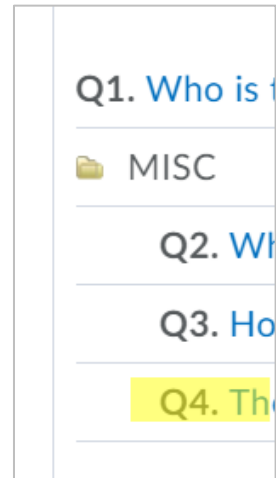

2. Find the appropriate quiz, click the down arrow and select **Grade**.

3. On the menu of the quiz page, click **Questions**.

4. Select the question in which you would like to view answers for.

Note: Adjustment to a quiz question will be noted and show which students have answered the edited question and which has answered the old version of the question.

Question 4

Note: This question is an old version as it was modified after the quiz was taken.

The sky is blue.

True

False
